NovaTech Solutions - IT Security Policy (Fictional Sample)

1. Purpose

This fictional policy describes how NovaTech employees must protect company systems and data. It applies to all employees, contractors and interns.

2. Passwords

Passwords must be at least 12 characters long and include uppercase letters, lowercase letters, numbers and a symbol. Passwords must be changed every 90 days and must not reuse any of the last 5 passwords. Multi-factor authentication (MFA) is mandatory for email, the HR portal and source code repositories.

3. Devices

Only company-issued laptops may be used to access customer data. Laptops must have full-disk encryption enabled and must lock automatically after 5 minutes of inactivity.

4. Remote Access

When working outside the office, employees must connect through the company VPN before accessing any internal system. Public Wi-Fi may be used only while connected to the VPN. Employees must not print confidential documents at home.

5. Reporting Incidents

Lost or stolen devices, suspected phishing emails and any other security incident must be reported to the IT helpdesk within 1 hour of discovery. Employees must not attempt to investigate security incidents themselves.

6. Violations

Violating this policy may lead to disciplinary action, including termination of employment.
